

BATHCENTRIC

Website Development Requirements — V1

Brand: BATHCENTRIC **Domain:** bathcentric.in

Business: Custom shower enclosures and related bathroom solutions

Website objective: Premium brand presentation + product showcase + qualified quotation/measurement leads.

1. Project Goal

Build a premium, modern, mobile-first website that presents Bathcentric as a professional shower-enclosure brand and converts visitors into enquiries. This is **not a traditional e-commerce website for V1**.

2. Required Website Pages

Page	Required content
Home	Brand introduction, product categories, key benefits, glass & hardware, projects, process, CTA.
Shower Enclosures	Overview of enclosure systems.
Fixed / Swing / Sliding / L-Shaped	Individual product/category pages with images, options, specifications and enquiry CTA.
Glass	Available glass types, thickness/specification and visual examples.
Hardware & Finishes	Handles, hinges, rollers, profiles and available finishes.
How It Works	Enquiry → measurement → quotation → manufacturing → installation.
Projects	Real completed projects with photos and basic project details.
About	Bathcentric story, positioning and quality approach.
Contact	Phone, WhatsApp, email, service area and enquiry form.
Get a Quote	Detailed enquiry/measurement request form with photo upload.

3. Homepage Direction

- **Hero:** “Designed around your bathroom.” with short supporting copy and **Get a Quote / Explore Enclosures**.
- Show the four main categories: Fixed, Swing, Sliding and L-Shaped.
- Show real product photography, glass options, hardware/finishes and selected projects.
- Explain the simple process: Enquiry → Measurement → Quote → Manufacturing → Installation.
- Prominent **Send Your Bathroom** section for customers to upload bathroom photos.
- Clear WhatsApp and click-to-call buttons.

4. Product Page Requirements

- High-quality product images.
- Short product description and key benefits.
- Starting price where applicable (final price based on dimensions/configuration).
- Available configurations and dimensions/limitations.
- Glass options and specifications.
- Hardware and finish options.
- What is included and installation information.

- Warranty information.
- Get Quote + WhatsApp CTA.
- CMS should allow Bathcentric to add/edit products, images and pricing.

5. Get a Quote / Send Your Bathroom

Form should include:

- Name
- Mobile/WhatsApp
- Email (optional)
- Location
- New bathroom / renovation / existing bathroom
- Preferred enclosure: Fixed / Swing / Sliding / L-Shaped / Not sure
- Approximate dimensions (optional)
- Upload bathroom photos
- Message / requirements
- Consent checkbox

Submission must generate a reliable lead notification to Bathcentric. Developer should specify how leads are stored, protected and exported.

6. Design & User Experience

- Premium, modern, minimal and architectural appearance.
- Mobile-first and fully responsive on mobile, tablet and desktop.
- Use real Bathcentric product/project photography wherever possible.
- Clean navigation, strong typography, generous whitespace and clear CTAs.
- Avoid a generic contractor/template look, excessive animation, clutter, unnecessary popups and stock-heavy visuals.

7. Technical Requirements

- **CMS:** Prefer a practical CMS such as WordPress or another suitable platform that Bathcentric can manage.
- Fast loading, optimized images, responsive layout and good Core Web Vitals performance.
- SSL/HTTPS, secure admin access, spam protection and regular backups.
- Basic SEO setup: page titles, meta descriptions, headings, image alt text, clean URLs, sitemap and robots.txt.
- Google Analytics and Google Search Console setup.
- WhatsApp click tracking, call clicks and enquiry submissions should be measurable.
- No unnecessary plugins or third-party dependencies.

8. Ownership & Handover

- Bathcentric must own the domain, hosting account, website/CMS, analytics, Search Console and business/social accounts.
- Developer receives access for development but should not be the sole owner of critical accounts.
- All website files, design files and admin credentials must be handed over at completion.
- Developer must clearly list any third-party software, paid plugins, licences or recurring fees.

9. Developer Proposal Must Include

- Technology/CMS proposed and why.
- Complete page/scope list.
- UI/UX and design process.
- Number of design revisions.
- Development timeline and milestones.
- One-time development cost.
- Hosting/domain/maintenance/third-party recurring costs.
- SEO, analytics, security, backups and performance included/excluded.
- Post-launch bug-fix/support period.
- Training/handover process.
- Any optional features priced separately.

10. V1 Scope — Keep It Focused

Do not include unless separately quoted: e-commerce checkout, payment gateway, customer accounts, product configurator, advanced CRM, partner portal, mobile app, automated dynamic pricing or complex custom software.

11. Launch Acceptance Checklist

- All agreed pages work correctly on mobile, tablet and desktop.
- Forms, photo uploads, WhatsApp and click-to-call work.
- No major broken links or layout issues.
- CMS editing is demonstrated to Bathcentric.
- Analytics/Search Console and basic SEO are configured.
- SSL, backups and admin security are active.
- All agreed content/images are uploaded.
- Bathcentric receives full account/admin access and handover documentation.

Important: Bathcentric will provide/finalize product specifications, pricing, warranty terms, company information, approved claims and product/project images. Developer should identify any missing assets before development begins.
